

AFTER SCHOOL CLASSES NOW ENROLLING!

Fall Session 2

Whether your child is new to LEGO® Bricks or is already an experienced builder, our proprietary lesson plans and model kits allow students of all ages to build machines and watch their motorized constructions come to life!

What will your child learn? Before your child begins to build, a brief lesson will provide the history of the model and its relevance to life today. Our projects, designed by engineers and architects, motivate children by reinforcing S.T.E.M. based principles while enhancing self-esteem, improving fine motor skills, and teaching important math skills. Our LEGO models use axles, pulleys, gears and are fully MOTORIZED.

All models and lessons are tailored toward your child's age. Each student will take home a custom mini figure at the end of the session. New models will be built each class – no repeat builds from previous sessions.

**Classes held at
HESSC Room 32**

November 7th – December 12th
No Class November 21st
Tuesdays 6:30–7:30 p.m.

\$75/5 week session
Space is limited to 16 children
